- Languages: Java | Python | SQL | HTML | PHP
- Front-End Frameworks: React.js | TailwindCSS | Angular
- Back-End Frameworks: Node.js | Spring Boot
- IDE: VS code | Antigravity
- VersionControl: Git | GitHub
- Other Tools: Figma | Canva | Photoshop

Education

Institute of Technology, University of Moratuwa
BSc in Information Technology

Moratuwa, Sri Lanka | Expected Graduation: 2026

Dudley Senanayake Central College – Tholangamuwa

Completed G.C.E. Advanced Level Examination (Physical Science Stream) — 2021

EXPERIENCE

Software Engineering Intern

Sri Lanka Ports Authority (SLPA) | Jan 2026 – Jun 2026

Tech Stack: Angular, Spring Boot, MySQL, Git

- Contributed to the development and enhancement of the Electronic Document Digitization System (EDDS) using Angular and Spring Boot.
- Participated in requirement gathering, UI/UX design, frontend and backend development, system testing, and bug fixing.
- Developed and integrated features including workflow management, file upload, document preview, and role-based permission handling.
- Designed and updated database structures, including ER diagrams, and assisted with backend API integration.
- Collaborated with cross-functional teams, participated in requirement discussions with business users, and presented project progress during review sessions.
- Performed module testing, code integration, merge conflict resolution, and system validation using Git.

Research

“A CASE STUDY-DRIVEN MODULAR ARCHITECTURE FOR SMART RETAIL MARKETING AUTOMATION IN SRI LANKAN SMES”

H.R. Anjana 1*, K. Subangi 2, S.A.M.P. Subhasinghe 3,
R.M.R.L. Rathnayaka 4, J.P.Y.K. Jayalath 5, D.A.S. Ruwanmini 6 and
D.L. Samarasinghe 7

In Proceedings of the

4th International Research Conference, Institute of Technology,
University of Moratuwa, 2025.

📁 PROJECTS

● Retail and Automation Marketing System

A retail-focused system that automates customer segmentation, marketing campaigns and performance tracking to improve engagement.

● SmartAttend – QR-Based Employee Attendance Management System

A full-stack web application built with React.js, Node.js, Express.js, and MySQL for employee attendance management. Features include QR code-based attendance, role-based authentication, employee management, attendance reports, dynamic QR code generation, and an admin dashboard with responsive UI.

● Visit Sri Lanka – Tourism Website

Technologies: React.js, Node.js, Express.js, SQLite, Tailwind CSS, JWT
Built a responsive full-stack tourism website featuring destination and hotel listings, tour packages, secure user authentication, and a feedback system. Developed RESTful APIs with Express.js and SQLite while designing a modern, mobile-friendly user interface using React.js and Tailwind CSS.
